

Maths Homework

Maths

All children have been given a TT Rockstars username and password. We ask that children log in and practise their timestables for at least ten minutes per week. This is an incredibly effective method for getting children to learn a crucial maths skill, which has massive impacts on their progress.

Take opportunities to extend your child's learning when outside of school - can they estimate how much money has been spent when out shopping? Ask them to calculate your change. Which is the better value for money? Baking is a fun (and hopefully delicious) way of getting children to use measures. Can they convert between units of measures?

Other useful websites...

[Khan Academy — www.khanacademy.org/maths/k-8-grades](http://www.khanacademy.org/maths/k-8-grades)

Although this is aimed at the American school system, it is a fantastic website; it's really informative, which will help your child to progress in maths. There are lessons to watch and tasks to complete.

[Top Marks — www.topmarks.co.uk](http://www.topmarks.co.uk)

This website is a perfect way to get children doing maths in a fun way — it's full of games. You can also choose other subjects and you can select games by your child's age.

[Maths Frame — https://mathsframe.co.uk](https://mathsframe.co.uk)

On this website, you can play more maths games and there are also tablet-friendly games for your children to play. Again, it's a great way to get your child to practise their maths skills.
