LO: To find a quarter.

How to find quarters of shapes, objects and quantities.

Understand that quarter means sharing amounts into four equal groups.

Understand the relationship between half of an amount and a quarter of an amount.

LO: To find equivalent fractions (2)

I can find equivalence through diagrams.

I know that multiplying the numerators and denominators by the same number to ensure that fractions are equivalent.

I understand what equivalent means.

Here is $\frac{1}{4}$ of Ron's marbles.
How many marbles does Ron have
altogether?

--	--	--	--

$$\frac{1}{4} \text{ of } \square = 2$$

Group A start

$$\frac{1}{3} = \frac{\square}{6}$$

$$\frac{2}{3} = \frac{\square}{9}$$

Use the different representations to find the equivalent fraction.

$$\frac{4}{5} = \frac{\square}{10}$$

$$\frac{4}{5} = \frac{8}{10}$$

What do you notice?

$$\frac{1}{3} = \frac{\boxed{2}}{6}$$

$$\frac{2}{3} = \frac{\boxed{6}}{9}$$

$$\frac{3}{4} = \frac{7}{8}$$

The diagram shows the fraction $\frac{3}{4}$ on the left and $\frac{7}{8}$ on the right, separated by an equals sign. A green curved arrow points from the numerator 3 to the numerator 7, with a "+ 4" above it. Another green curved arrow points from the denominator 4 to the denominator 8, with a "+ 4" below it. The number 7 in the numerator of the second fraction is enclosed in a blue square box.

Do you agree with Tiny?

$$\frac{3}{4} = \frac{\square}{16}$$

$$\frac{2}{9} = \frac{6}{\square}$$

$$\frac{7}{\square} = \frac{14}{20}$$

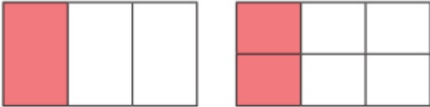

$$\frac{3}{7} = \frac{\square}{\square}$$

How can we find the missing numerators and denominators?

$$\frac{3}{\square} = \frac{\square}{20} = \frac{9}{\square} = \frac{6}{8}$$

Shade the diagrams to help you complete the equivalent fractions.

The first one has been done for you.

LO: To recognise a third.

I can apply my understanding of other fractions to finding thirds.

I know how to write one third as a fraction and explain what each of the digits represent in the fractional notation.

I understand that one third is equal to one part out of three equal parts.

LO: To find fractions greater than 1.

I can use manipulatives and diagrams to show that a fraction can be split into wholes and parts.

I know that if the numerator is bigger than the denominator, the fraction is greater than 1.

I understand how many parts equal a whole.
